Point your browser to http://bit.ly/2rKiD03 to access PureTEC Cloud.
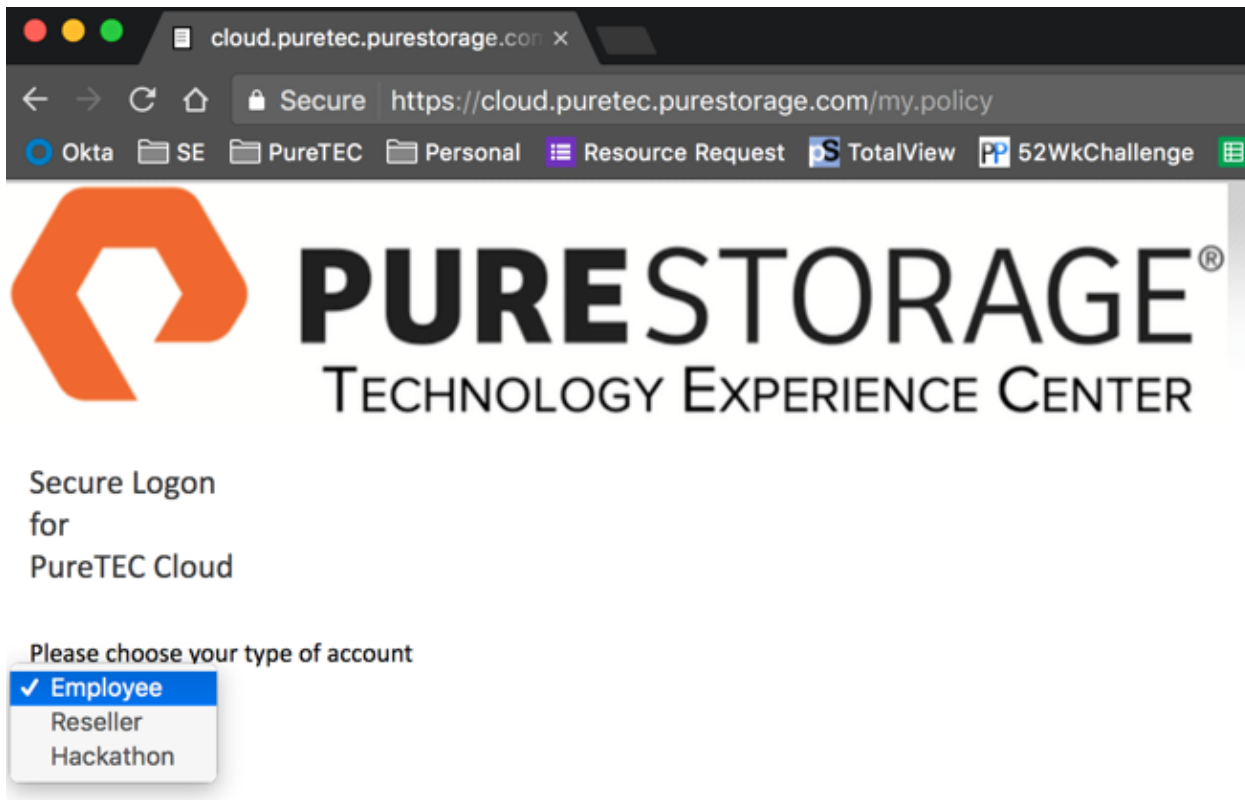

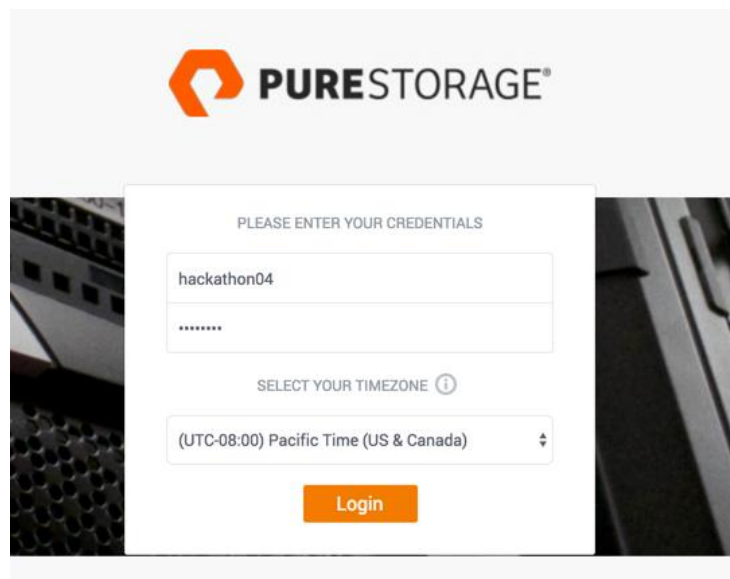

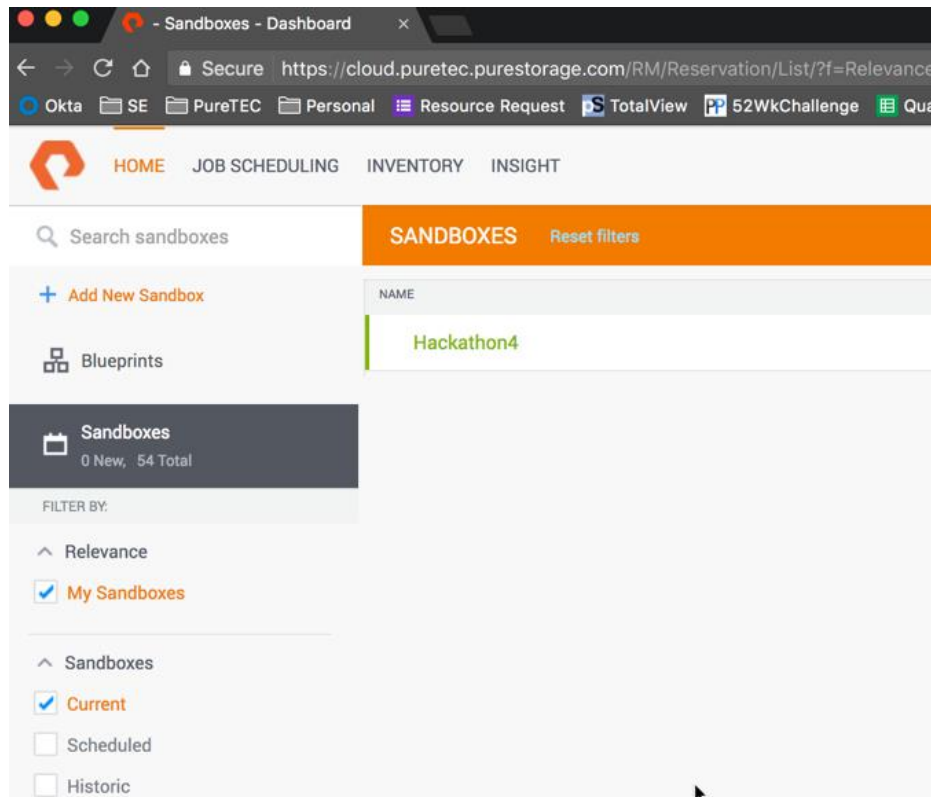

Select "Hackathon" from the pull down menu on the left and click "logon":

Login with your credentials, like hackathon00/WXYZ1234, and choose your timezone:

Select "Sandboxes" on the left and check the "Current" check box. You will see your Hackathon sandbox in the list. Click on it to open the sandbox.
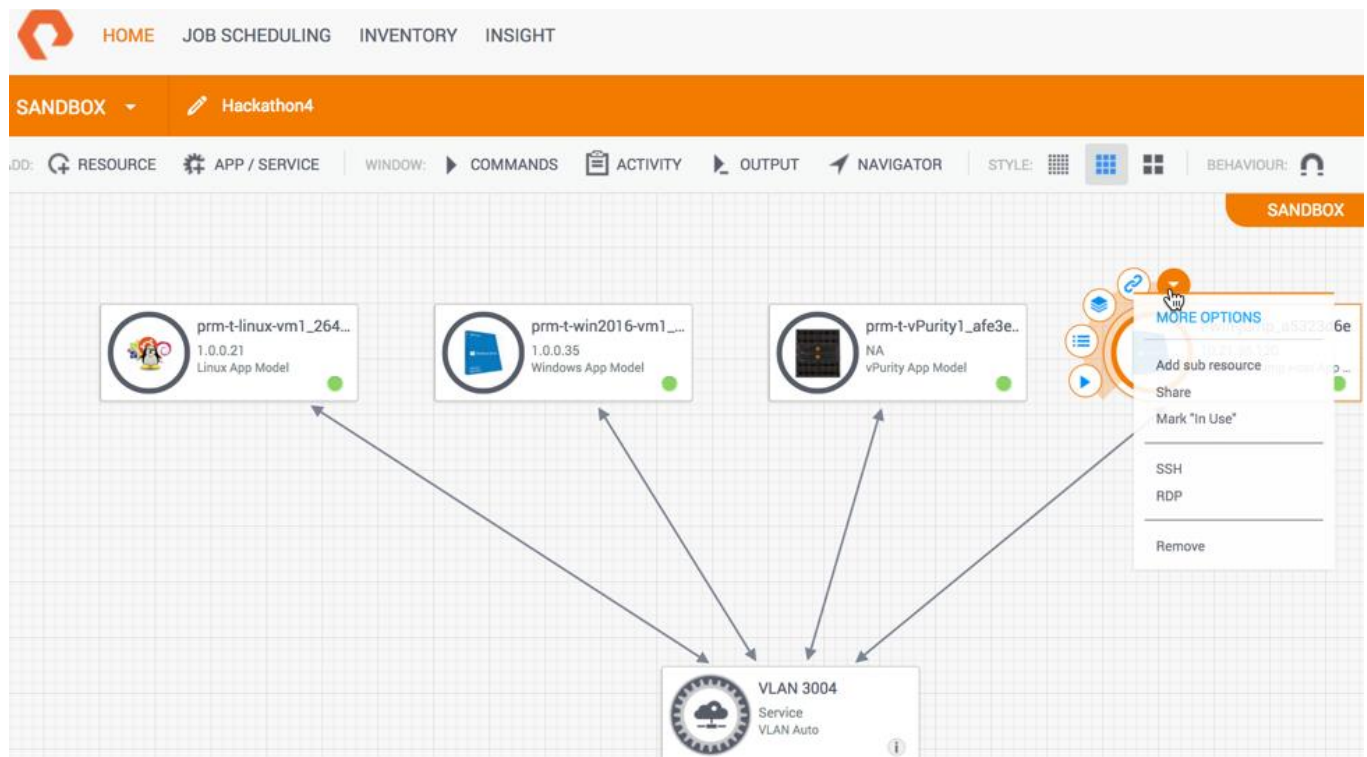

Close any "tour" windows that pop up. Find the object on the top right with t-win-jump in the name:

Hover over it to bring up a menu, select the top icon for a pull down menu:

Select RDP to open a remote desktop session in another browser tab:

Click on Advanced and proceed… to get past the security certificate warning.

You will then see an RDP session in your browser. If you see a blue "Networks" notice on the right side like below, please click on Yes.

You will see icons on the left side of the screen to access the systems in your sandbox:

Open up a browser window to access the FlashArray (login/password is pureuser/pureuser)

Open an RDP session to the Windows Server 2016 VM (Administrator/P@ssw0rd

Open a putty ssh session to the FlashArray (pureuser/pureuser)

Open a putty ssh session to the Linux server (root/password).

Here is what the Windows Server 2016 looks like. See Barkz's blogs for more instructions!
